## W. P. R. A. Holds Meeting

There was a full attendance at the refiners' meeting yesterday, some companies not holding membership. companies not holding membership but who participated, were on hand. This includes the Tidal and the Pure Oil companies. The session lasted the entire day, and the whole aspect of the markets was freely discussed. The president. Pat Malloy, was au-thorized to issue to the public a statement. It is as follows:

The independent refining in-dustry is united upon the question that the market can and will be

The fullest information, as it ffects prices, stocks and demand, till be fornished to the industry

It was decided to create an oil exchange, for the purpose of listing the prices of petroleum from day to day, the exchange to be conducted on the same general plan as other industrial exchanges, such as cotton, etc.

"A committee was appointed to

"A committee was appointed to conduct the details of establishing such an exchange, and the possible organization of a responsible brokerage company.

"The committee appointed is as follows: E. W. Marland of the Marland Refining company; E. R. Ferry of Costlen & Co.; L. L. Marcell of the White Eagle Refining emopany of Wichita, Kan.; W. L. Kistler of the Producers & Refiners corporation; Julius Germany, of the Panhandle Refining company of Dallas; W. H. Welch of the Tidal; E. R. Ashton of the Pure Oil company; E. W. Goble of the Kansas City Refining company; W. B. Hassett of the Imperial Refining company of Fort Worth, and P. M. Miscal of tre Empire refineries.

incres. It developed that the stocks of light oil on hand in Kansas, Okiahoma and Texas were negligible. There will be no gasoline or kerosene, or very little, on the market until well after the first of

"The fuel oil interests will demand further attention. That all the markets will, through the assistance of the whole industry, be shortly stabilized, was the unani-

mous opinion of everyone of the

"It must be remembered that the men at the meeting were rep-resentatives of more than 50 per cent of the gasoline production of three states. More than 75 com-

cent of the gasoline production of three states. More than 75 companies, operating the great independent plants of Kansas, Oklahoma and Texas, are absolutely united upon the necessity of stabilizing the market. Whatever is necessary to be done, will be done. "The industry, the public, and particularly the financial interests of the country can count upon the united effort of all the independents, inside and outside the association, to do their full part. One thing is certain, that the prices at the refinery for all petroleum products must be fair, and something more than the cost of manufacturing. A return to normal conditions shortly after the first of the year, is the expectation of the independents. They have full faith in their ability to produce that result."

result."
The above announcement will be received by every fair-minded man who has followed the fortunes of the independent refiners, with un-mixed pleasure. It means that the market will be stabilized, and that

market will be stabilized, and that the refiners will be in a position to know of any price-cutting that is either necessary or malicious, and will be well within the law by establishing a general sales agency.

For many years, this same idea has been talked about whenever refiners have met, but never until now has it been given a practical test. It is about time that something of this kind was accomplished, inasmuch as there are numerous combines of purchasing agents, and especially has there been one formed only recently that has had for its purpose.

Here are some of the facts, as set forth in a recent survey made for the San Francisco chamber of commerce.

Field stöcks of crude oil in Callfornia fell from 57,000,000 barrels on January 1, 1916, to 23,400,600 barrels on August 31, 1920.

Since January 1, 1916, to 23,400,600 barrels on January 1, 1919, field stocks in this state reclined by 9,608,600 southwest of northwest of southwest of 12-14-15.

The Number One Oil company has a dry bole at 1,751 feet in the southwest of northwest of southwest of 12-14-15.

Oil Supply Declines.

Oil Supply Declines.

Our supplied to the facts, as set forth in a recent survey made for the narrely survey made for the narrely survey made for the survey made for cently that has had for its purpose the supplying of many marketers throughout the country. What is sauce for the goose, is sauce for the gander.

The determined attitude of the refiners has already produced sulfs, as many marketers throughout the country. What is sauce for the gander.

It is pointed out that this last cates year.

refiners has already produced re-sults, as many of the most reliable marketers have already signified their intentions of working with the refiners and helping stabilize the

### Prairie Has Good Well Northwest of Bristow

The Prairie Oil & Gas company's test northwest of Bristow, reported recently as showing for a well, and located on the Ashmore farm in the southeast corner of the northeast of the northeast of 15-17-8, has been dilled deeper total another hay and the northeast of 13-17-3, has drilled deeper into another pay and at three feet in sand topped at 3,135 feet the well made one big flow and is producing about 3,000,000 feet of

They still have about 300 feet of open hole and the well is caving badly. They are shut down moving badly. They are shut down moving the beiler back to drill in and build-ing tankage. The oil is black and is coming from either the Dutcher or

West of Depew the Prairie well on the Hicks farm in the center of the north half of the west half of the southeast of 6-15-7, has been drilled deeper into the pay, but is not showing any gas to flow it. It will be given a small shot tomorrow. The showing is estimated at about five barrels natural. Total depth of this test is 3,327 feet.

Itant, providing the ratio between production and consumption remains constant.

The underlying factor of the shortage, according to the Los Angeles chamber of commerce, which has followed the off situation since warnings issued more than a year ago by the large oil producers, is that while 350 barrels a year used to be produced for each consuming unit such as a gas engine or auto-

good well in the 2.100-foot pay, in, are found, or conservation is practiced by the center of the south line of the southeast of the northwest of 26 and kaseline for motive power. The

## Indiahoma Has Gas Well

only solution thus far advanced for the problem in its present form is the development immediately of every resource of hydro-electric The Indiahoma Oil & Refining Co. has a 15,009,006 cubic foot gas well in the 2,200-foot sand, in their test in the northwest corner of the south-west of \$3-13-11. The well is being In the Phillipsville Pool.
The Texas Company's No. 11 well on its fee, located in the southwest corner of northwest of 11-14-11, is estimated at 1,800 barrels daily after shut it

Jefferson, in the southeast of north-west of southwest of 11-14-11.

The Okmulgee Oil Leasing com-pany's No. 2 Jefferson at the center of the north line of northeast of southwest of 26-14-11 has been abandoned at 2,316 feet, after a long fishing job.

(From the Los Angeles Herald.) Because the fuel oil situation is leemed of vital concern to every inlieving the shortage of field stocks has gone out in an effort to prevent conditions from growing steadily worse.

It is pointed out that this indi-cates very clearly that since the first of 1919 there has come into ex-istence a period of rapid field stock depletion. During that time there were no important intervals of recovery or building up.

Even if allowance is made for

gains in refinery stocks, the rate of consumption in excess of production was 26,000 barrels a day during January of this year, as compared with 3,000 berrels a day on an average of the calendar year of 1919.

To make the comparison with the strictly comparable periods from January to June of both years the figures are still more impressive The net stock decrease in California during the first six months of 1920 was at the rate of 32,500,000 barrels

With a total of 23,400,000 barrels of field stocks on August 31, 1920 and assumed refinery stocks of 8, 000,000 barrels on that date, it is clear that an actual shortage of oil resources in California is not far distant, providing the ratio
